

Corecon V7 Software Selected as a 2012 Residential Top Product by Constructech Magazine

Corecon V7, a Web-based platform for estimating, project management, job cost control and scheduling, was recently selected as a residential 2012 Constructech Magazine Top Product.

Huntington Beach, Calif. ([PRWEB](#)) February 15, 2012 -- Corecon V7, a Web-based platform for estimating, project management, job cost control and scheduling was recently selected as a residential 2012 Constructech Magazine Top Product.

The Constructech Residential Top Products Awards honor technology solutions that have demonstrated the greatest innovations geared toward the homebuilding market. The winning solutions are judged by Constructech magazine's editorial team and are selected based on various criteria, including the product's growth rate over the last few years as well as the product's overall usefulness and uniqueness to the construction industry. To learn more, visit [constructech.com](#).

The judges noted that they particularly liked the complete technology overhaul of the product, especially Corecon Technologies latest collaboration application—TeamLink Portal— for sharing project information among team members. Free to all Corecon V7 subscribers and others involved in the project, TeamLink Portal streamlines the construction process by providing the residential developer or home owner as well as all other project team members with secure, real-time access to information corresponding to all phases of the project.

“This year's Top Products award winners offer the best in functionality and cost effectiveness.” said Peggy Smedley, editorial director, Constructech magazine. “It is exciting to watch a product such as Corecon advance and provide even more capabilities for mobility, collaboration and integration.”

“We are honored that Corecon V7 has been recognized as a residential Constructech Top Product for the second consecutive year,” said Norman J. Wendl, president of Corecon Technologies, Inc. “The launch of Corecon V7 in 2010 and the recent addition of our new TeamLink Portal are helping residential builders streamline operations by providing them with a more complete and efficient project management solution.”

About Corecon Technologies

Corecon Technologies provides project management software solutions for general contractors, subcontractors, homebuilders, remodelers, developers, engineering and professional service firms. Corecon's flagship product, Corecon V7, has been recognized as one of Constructech Magazine's Top Residential and Commercial Products in 2011 and the firm has been named Constructech's Hottest Companies and Companies to Watch in the past years.

Utilizing the latest Web technologies, Corecon's online construction software suite provides constant connectivity anywhere, anytime whether using a laptop, netbook, tablet or mobile phone. The firm is the only company with a web-based suite of construction software on the market that provides business development, estimating, document control, contract administration, job cost control, scheduling and collaboration with integration options to popular accounting systems such as Intuit Quickbooks or SAP Business One®.

Based in Huntington Beach, Calif., the company was founded more than a decade ago by construction industry experts who seek to design software that provides cost-effective, user-friendly tools to ensure successful project delivery.
